Dear Team,

I'm motivated to be applying for the **Senior Backend Engineer** at BENDING SPOONS. I am a professional who is highly focused and attentive to detail, I succeed in building quality software products that exceed end user's expectations. I'm excited at the opportunity to show off my technical expertise and leadership skills as part BENDING SPOONS **expert team.**

I am working as a **Senior Software Engineer for Nissan Motor Corporation**. In my current tenure with Nissan, I defined & implemented Omni channel sales systems for Nissan like Data API platforms for Nissan websites across the globe, social media integration, dealer business systems, and Partner API platforms. I have good exposure in developing applications using programming languages like **Java, Spring boot, GoLang etc**. Add to it I have 8+ years of experience in building cloud-native applications leveraging **AWS** as well as **Azure**.

Prior to Nissan, I was with **EY (Ernst and Young)** for building complex software platforms for **Insurance, Tax and Banking industries.** I am also attentive to the need for continuous process improvements.

Thank you for your time and consideration. Request you to please go through my resume to get the flavor of my career achievements. I'm looking forward to work and learn more details at BENDING SPOONS .I'm excited to take this opportunity as a challenge and provide my utmost commitment to developing world-class software products for **BENDING SPOONS .**

Yours Sincerely,

Arun Sasidharan
